

ENVIRONMENTAL POLICY

Amromco Energy considers that a high standard of Environment protection is critical to the success of our business. No operation is successful without taking into account the protection of the Environment. Amromco Energy is committed to continually improving its environmental performance and the prevention of pollution by undertaking the following:

- Compliance with all applicable legislation, regulatory requirements, industry standards for environmental protection and ISO 14001:2015 standard requirements;
- Develop, implement and maintain an operations-specific environmental management plan that includes a relevant emergency response and appropriate remedial measures in situations where a potential significant environmental impact is identified;
- Monitor, measure and improve environmental performance throughout the life-cycle of each project and optimize energy and water consumption;
- Adopt waste management strategies that promote effective waste minimisation and management (reduce, re-use, recycle).

This policy applies to all Amromco Energy employees, contractors and consultants and everyone should abide by it.
